EXPERIENCE

T-Mobile, Factoria, WA

UX Designer/Front End Developer, 7/2017 – Present

Work as designer for a team of engineers, creating mock-ups and redesigning old internal applications.

- ♦ Creates visual mock-ups and wireframes for web applications.
- ♦ Works with a constantly changing and diverse team of engineers, designers, and programmers to create new applications.
- ♦ Implements highly interactive and responsive web pages based on designs that conform to both team and T-Mobile branding guidelines.

Washington Gaming Association, Seattle, WA

Lead Graphic Designer, 10/2015 – 6/2016

Led Branding Team for non-profit organization at UW, aiding all teams with creation of visual assets. Spearheaded process for defining and laying out branding guidelines for future projects.

- ♦ Developed and maintained excellent working relationship across teams by clearly communicating team progress on new assets regularly.
- ♦ Collaborated on several passion projects outside of regular duties, including educational presentations and helping form self-improvement programs for club members.

SPSInteractive, Seattle, WA

UX Designer (Capstone Project), 1/2016 – 6/2016

Key member in small team sponsored by Microsoft's Technology and Civic Engagement Department. Driving force behind design choices and product branding, and leader in team communications.

- ♦ Shaped project development through design ideation, wireframes, usability testing, and brand design.
- ♦ Collaborated with teammates to create visual sales pitch for product, earning the team the **"Social Impact Award"** at UW's 2016 Capstone Night.
